AGP Allegiance Group & Pursuant

Website Security Checklist for Nonprofits: *Where to Start*

A practical checklist for evaluating your website's security. Implement a maintenance plan that includes the following:

- [ ] **Access to the domain registration and DNS providers**
- [ ] **Access to your hosting portal**
- [ ] **All WordPress paid plugin licenses retained**
- [ ] **Security monitoring services installed (Wordfence)**
- [ ] **Automated backups with multi-week retention**
- [ ] **Custom code is in version control, and you can access it**
- [ ] **WordPress security updates are automated/applied regularly**
- [ ] **Automated security testing of the website and custom code**
- [ ] **Hosting provider employs a Web Application Firewall, or get your own Cloudflare account setup**

A secure website protects more than your technology.
It protects your fundraising, marketing, and donor relationships.
Talk with AGP about building a security plan your team can count on.
